

What makes me the ideal candidate for this role?

I bring over ten years of experience across product leadership, supply chain strategy, business analytics, process engineering, business analysis, and continuous improvement. I have a strong ability to ask the right questions, think critically, solve complex problems, and turn ideas into practical solutions. I bring adaptability, sound judgment, and clear communication. These strengths allow me to lead through change, collaborate across teams, and deliver results in a workplace increasingly shaped by automation and intelligent systems.

What key qualifications and technical expertise do I bring to this role?

- **Education:** Master's degree in technology and business fields.
- **Product Development:** Skilled in vision creation, roadmaps, and prioritization, with experience in leading cross-functional teams.
- **Software:** 8+ years of software product experience across e-commerce, energy, supply chain and procurements, finance, GTM, launch, and monetization, B2B, B2C, and process improvement, with strong experience driving customer adoption of early-stage software products.
- **AI/ML Expertise:** Experience integrating Machine Learning models, LLMs, or AI-driven features into production systems at scale
- **Data & UI Flows:** Extensive background in data pipeline design, AI factories, and building UI workflows, automation, and executive dashboard creation using SQL, n8n, Airtable, Alteryx, and visualization tools (Tableau, PowerBI) and AI tools, including MCP Servers.
- **Certifications:** Multiple certifications in product management, agile software development, AI, and data science.
 - Product School [Certifications](#)
 - RAG and Agentic AI Professional Certificate – IBM
 - Applied Data Science Lab - World Quant University: [See details](#)
 - Agile Software Development Certificate - University of Minnesota
 - API Product Manager, Designer, Security Architect - [API Academy](#)
 - API Development and Architecture, Hands-on Agentic AI: Building Intelligent Agents – Edureka
 - AI-powered UI/UX, Design Thinking Specialization – University of Virginia, IESE Business School
 - Microsoft 365 Copilot AI, Building with the Claude API, Google AI - Microsoft, Google, & Anthropic
 - Solution architecture (AWS, GCP, Microsoft).

Work Experience

Microsoft Corporation, Redmond, WA

Senior TPM Product Lead, Monetization and Business Planning (MBP) AI and Intelligent Automation

May 2025 – Current

Driving end-to-end AI, analytics, and intelligent automation solutions across Engineering, Sales, Compliance, Support, Finance, Tax, Product Marketing, Go-to Market, and Operations to build pricing and launch platforms that accelerate business growth.

Responsibilities:

- Lead product vision and strategy for MBP automation development and deployment within MBP.
- Develop the roadmap for AI and automation products, considering the rapidly evolving AI landscape and competitive environment.
- Manage the AI product lifecycle, from ideation and development through launch and post-launch optimization.
- Collaborate with developers and business planners to define, design, and implement automation and AI agent use cases for Platform.
- Work closely with Software Engineers, QA, UX, PMs, and other engineering teams to deliver high-quality products and features through the software project lifecycle, including build, testing, and timely release.
- Manage the MBP Launch/Pricing and Google/App Store automation and data platforms.
- Lead the development and presentation of strategic initiatives and key metrics to the leadership team on a quarterly basis.

Highlighted Achievements (Over \$55M in savings YTD):

- **Microsoft Launch Platform:** Delivered the first Microsoft's first multi-agentic solution, achieving end-to-end integration with the Microsoft Launch Center and Commerce systems within three months, boosting launch efficiency by 75%.
- **Consumer AppStore Automation AI Agents:** Developed and launched the Microsoft Launch Requirements and Consumer Pricing Appstore AI Agents within three months of joining Microsoft, streamlining launch requirements process, price discovery, pricing, and publishing processes across Microsoft, Apple, and Google App Stores. Achieved over 1,000 hours of savings per quarter and reduced vendor costs by over 70%.

Amazon 2018 to 2025

Lead Senior Technical Product Manager, Insights, Planning, Analytics and Technology (IPAT) AI/ML Products Team.

November 2022 – May 2025

Responsibilities:

- Drove product strategy and delivery in partnership with Director/VP+ leaders ensuring alignment with overall strategy
- Mentored a team of four technical product managers, overseeing the worldwide Amazon three-year strategy and roadmaps for the AI team, working cross-functionally with Amazon to design and implement scalable, automated, and data-driven enterprise solutions.

- Defined and executed product vision, strategy, and roadmaps by developing, deploying, evaluating and monitoring AI/ML products that integrate AI/ML into Finance that streamline and scale end-to-end planning and decision-making across WW Amazon.
- Collaborated with engineering and data science teams to design, develop, deploy, and monitor scalable AI/ML models.
- Responsible for a variety of key tasks from ideation to launch, including user research, market and competitor analysis, resource prioritization, leading cross-functional teams, and gathering requirements to inform, develop, and deploy end-to-end solutions.
- Owned product performance metrics (core metrics, health, and counter metrics) tracking and reporting, including user adoption, customer satisfaction, and lead the monthly business reviews and reporting to senior management.

Highlighted Achievements:

- **2025 IPAT-on-the-back Recipient:** This award celebrates IPAT Amazonians who have delivered exceptional results by developing and launching solutions scaled and adopted globally that drive a 10X or greater impact across Amazon worldwide.
- Launched the first driver-based machine learning modeling platform for worldwide (WW) Amazon Stores Established Markets for P&L accounts hands-of-the-wheel forecasting and planning, with integrated MLOps infrastructure and an enterprise-grade graphical user interface. This tool streamlined planning for over 1,000 users across five established marketplaces, cutting planning time requirements from 128,000 hours to less than 1 hour quarterly, resulting in improved forecast accuracy from below 80% to 99.8%.
- Created the first Amazon proof-of-concept for a parameter efficient fine-tuned LLM-based (Fin Q&A agent with RAG framework) tailored for month-end close (MEC) Q&A and summarization, significantly decreasing the time needed to finalize MECs reporting from three days to less than 30 minutes per controller, resulting in over 40,000 hours saved quarterly.
- Designed and launched the ASFS MLOps Model Orchestration Hub, enabling seamless integration, deployment, and monitoring of models for Amazon Finance scientists and developers, which enhanced metrics monitoring for accuracy and data/feature drifts.
- Designed and launched My Analytics Companion (MAC), an LLM analytics agent tool used by over 1,000 users across Amazon Stores, Established Markets, Marketing, and Sales teams. MAC saves over 10,000 hours quarterly by using OpenAI function calling and three tools: a database lookup tool, a data analysis tool, and a code generator. It automatically produces data-driven insights, creates graphs for visualization, and provides real-time understanding of sales data trends and anomalies.
- Designed and launched an anomaly detection ML tool for Amazon's worldwide sales data, achieving 99.8% accuracy in detecting fraudulent transactions—50% higher than the previous rule-based model—scaling its implementation across all North American operations.

Manager, BI & Technical Product Management, AWS Infrastructure Supply Chain and Procurement Product Planning & Analytics

June 2019 – November 2022

Responsibilities:

- Led a team of three product managers, two business analysts, and three data engineers, and was responsible for the three-year roadmap.
- Authored business requirements documents (BRDs) and technical requirements documents (TRDs) for new products and built automated dashboards to track business progress against targets and trained stakeholders on tools, metrics, and product costs.
- Owned and managed the capacity rate card planning product for over \$23B in annual supply chain and procurement expenditure planning and analytics across AWS supply chain, working with Finance, Supply Chain, Tier-1 Original Design Manufacturers (ODMs), Contract Manufacturers (CMs), and Tier-2 Original Equipment Manufacturers (OEMs).
- Managed data pipelines and conducted non-routine end-to-end analyses, including data gathering from complex data sets ingested from ODMs, OEMs, and CMs into data lakes, and employed advanced statistical and ML methods to improve deliverables quality.
- Leveraged SQL, Python, Alteryx, QuickSight, and Tableau to create workflow, extract and analyze data center server and networking racks supply chain, procurement, and financial metrics including, Capex, and supplier segmentation and spend.

Highlighted Achievements:

- Developed and deployed the AWS Buy-Sell product and TCO modeling, resulting in annual savings exceeding \$50MM.
- Developed and deployed the Predictive (Should Cost) tool, generating annual savings of about \$50MM.
- Automated vendor purchase orders and invoices exception reporting, saving over 2,000 hours of manual tasks and \$25MM annually.
- Developed and launched the logistics Direct Pay vertical integration solution, resulting in savings of over \$96MM in five years.

Sr. Technical Program Manager, New Product Introduction (NPI) and Advanced Manufacturing

May 2018 – August 2018

- Developed an automated capacity planning model for advanced manufacturing, resulting in over \$1.2MM annual cost savings.
- Created supplier quality dashboards for Devices' advanced manufacturing teams, saving over 40 hours per quarter.
- Supported three NPI launches and led a Six Sigma project saving over \$2MM annually.
- Collaborated with contract manufacturers to prepare factory lines and support automated product validation tests.

Golder Associates Limited. Calgary, Canada

Program Management Consultant, Engineering

January 2016 – July 2016

- Delivered over 10 consulting projects, consistently meeting deadlines and budgets.
- Managed a team of 10 consultants, overseeing safety and risk management.
- Successfully executed two multi-award exploration projects in western Canada, adhering to schedules and budgets without incidents.

BHP Billiton, Toronto, Canada

Engineering Program Manager, Safety Engineering & Operations Readiness

May 2012 – March 2015

- Provided support for the \$12 billion Jansen project, including delivery and enterprise-wide safety management systems like BHP Automation One, automating 90% of business processes across Finance, Supply Chain, Procurement and Risk Management.
- Designed and launched the Stature risk management platform, achieving zero reportable safety incidents through automated risk assessments, design reviews, and data collection on risk and safety KPIs.
- Managed a team of four safety engineers, overseeing prevention through design, incident investigation, root cause analysis, and implementation of SAP and Stature systems.
- Launched the Safety Prevention through Design (PtD) Initiative and compliance automation for BHP Billiton, integrating design reviews and Failure Mode and Effects Analysis (FMEA) into new program introductions. This resulted in a 45% improvement in operations readiness effectiveness score and eliminated material safety risks, earning a commendation from the CEO.
- Optimized project man-hour allocation and product supply to emerging markets using Solver linear programming, resulting in over \$10MM in cost savings over five years and managing an annual budget of over \$800MM with 95% cost efficiency.

Intercontinental Banking Group, Lagos

Regional Product Manager, E-Banking B2B Products

September 2006 – August 2009

- Oversaw the development and launch of two e-payment products for educational institutions, resulting in revenue growth. Collaborated cross-functionally with design, engineering, and marketing teams to launch features that expanded the product's market reach, contributing to a 40% year-over-year growth in revenue for e-products.
- Successfully led the redesign of the bank's marketing platform which included personalized recommendations and enhanced search functionality, resulting in a 30% increase in user engagement and a 25% boost in conversion rates within six months.
- Contributed to the launch team responsible for migrating the legacy Kapiti system to Flex-Cube, enhancing bank-wide efficiency for product delivery and operational effectiveness by over 50%.

Education

- **Yale School of Management, New Haven, CT.**
Accelerated Executive Management Program (Distinction).
- **Arizona State University W. P. Carey School of Business, Tempe, AZ.**
MBA, Forward Focus Scholarship and Fellowship Recipient
- **University of Nottingham, University Place, Nottingham, United Kingdom.**
MSc, Process Engineering, Developing Solutions Scholarship Recipient.

Co-curricular Activities

- Co-Founding Member, SparkInnovation (2017–2019): As Vice President of Strategy, I led the development and execution of comprehensive go-to-market strategies for four startup companies. Additionally, I conducted in-depth market research and conducted formal analytical studies to support these strategies. I actively participated in weekly meetings and strategy sessions, contributing to the successful development of proof-of-concepts, usability testing, and minimum viable products (MVPs).
- President, Arizona State University Business Information Management Association (BIMA) (2018–2019): During my tenure as BIMA president, I led the launch of Product Management Central, a comprehensive portal that facilitates the submission of data tasks by local Arizona small businesses to students as pro bono projects. This initiative has proven instrumental in assisting over 20 businesses annually since 2018 in addressing their pressing data-related challenges.

Community and Social Responsibilities

- **Founder, Future Leaders Scholarship Program:** Provides scholarships to 18 high school kids from inner cities in Africa annually.
- **Board Member, Board of Directors, Global Visionaries, Seattle, WA.** Non-for-Profit organization leading, driving and envisioning a future where young people are boldly leading an inclusive movement for environmental and social justice.
- **Volunteer MBA Consultant, Junior Achievement of Arizona:** Supported Junior Achievement of AZ President to develop business performance metrics and implemented a streamlined tool for donation management.
- **Volunteer MBA Consultant, Saint Vincent de Paul Society:** Supported Saint Vincent de Paul Society's management team to automate their Inventory Management System, leading to annual cost savings exceeding \$50,000.
